SUMMARY

Highly motivated Senior Software Engineer with experience in designing and developing high-scale distributed systems, expertise in multiple programming languages, and a strong background in monitoring and observability. Proficient in cloud platforms and passionate about delivering scalable and efficient software solutions.

TECHNICAL SKILLS

- Programming languages: Java, Python, C++
- Cloud platforms: AWS, Azure, Google Cloud
- Distributed systems: design, development, and deployment
- Monitoring and observability: tools and techniques
- Strong system design skills: architecture, scalability, and performance

WORK EXPERIENCE

Senior Software Engineer

ABC Company

2020-Present

Tallahassee, FL

- Designed and developed multiple high-scale distributed systems using Java and Python, ensuring scalability and efficiency
- Implemented monitoring and observability tools to improve system performance and reliability
- Collaborated with cross-functional teams to design and deploy cloud-based solutions on AWS and Azure

PROJECTS

- Developed a cloud-based monitoring system using Python and AWS, improving system uptime by 30%
- Designed and implemented a distributed database system using Java and Google Cloud, increasing data processing speed by 25%

EDUCATION

Bachelor of Science in Computer Science

XYZ University

2015-2019

Tallahassee, FL

PUBLICATIONS & AWARDS

- Review Classification & False Feedback Detection (IJAST)
- 2nd Place, SRM University Hackathon (2019)
- AWS Solutions Architect Course (Udemy, 2024)
