SUMMARY

Highly motivated software engineer with experience in distributed systems, strong programming skills in Python, and knowledge of cloud platforms such as AWS. Proven ability to work on complex projects and collaborate with teams to achieve common goals.

TECHNICAL SKILLS

- Programming languages: Python, Java, Go
- Cloud platforms: AWS, GCP
- Database systems: relational and NoSQL databases
- Operating Systems: Linux, Windows

WORK EXPERIENCE

Software Engineer
ABC Company

Jan 2020 - Present
Tallahassee, FL

- Designed and implemented a distributed system using Python and AWS, resulting in a 30% increase in system efficiency
- Collaborated with the development team to resolve complex technical issues and improve overall system reliability
- Utilized cloud platforms such as AWS to deploy and manage applications, ensuring high availability and scalability

PROJECTS

- Developed a cloud-based application using Python and AWS, demonstrating expertise in distributed systems and cloud platforms
- Designed and implemented a database system using relational and NoSQL databases, showcasing knowledge of database systems

EDUCATION

Bachelor of Science in Computer Science
XYZ University

2018-2022
Tallahassee, FL

- Coursework: Data Structures, Algorithms, Computer Systems, and Cloud Computing

PUBLICATIONS & AWARDS

- Review Classification & False Feedback Detection (IJAST)
- 2nd Place, SRM University Hackathon (2019)
- AWS Solutions Architect Course (Udemy, 2024)
